*** Number for Technical Support:
404-639-3737

*** Technical Requirements for Web Access:

Step 1:   Your browser must be Internet Explorer 5.0 (or later), or Netscape 4.7 (or later).

Step 2:   You must have a Windows Media Player installed on your computer or network.

Download
Windows Media Player

Step 3:   If you cannot view the webcast, your computer may not meet the minimum system requirements to run your Windows Media Player version. Please click on the following link to check the system requirements for your Windows Media Player version:

http://www.microsoft.com/windows/windowsmedia/<9series/player/sysreq.aspx

If you meet the minimum system requirements, continue to Step 4.

Step 4:   If you still cannot view the webcast, there may be problems with your network. Please contact your systems administrator and work through the following questions:

Do you have a security device such as a firewall or proxy? Either of these may prevent you from viewing streaming video or audio content. Only your local systems administrator can make changes to these devices.
Are you using a personal firewall or DSL/Broadband router? If so, you may have problems viewing streaming content. If you experience connection problems and are using either of these, you should disable them or remove them for the duration of the webcast.
For more information on Media Player and network/firewall issues, please refer to Media Player Firewall Support page at http://www.microsoft.com/windows/windowsmedia/serve/firewall.aspx#player.

If you are still unable to solve the problem, continue with Step 5.

Step 5:   There may be problems with the settings or operations of your Media Player version. Please click on the following link to open a support page window. Media Player http://support.microsoft.com/default.aspx?pr=wmp
